

The endogo® puts the capabilities of the traditional video tower system in the palm of your hand

The endogo® palmable endoscopic camera, is the world's first battery operated, portable, hand-held endoscopic video camera with integrated viewing and archiving capability.

With the endogo®...

Transform your patient encounters and increase your clinical efficiency

Quickly and efficiently demonstrate to a patient their disease process – saving time, enhancing your credibility, and increasing patient compliance.

Augment your practice by fully leveraging your imaging capabilities

Expensive, bulky, and static video tower systems can lead to patient back ups and decreased utilization as moving patients from room to room just isn't practical in today's busy health-care environment. This effectively reduces your return on investment with standard video equipment.

You can now afford to have imaging capability in every room, in multiple practice locations, and on the go

Providing economies of scale that allow faster ROI than traditional systems.

Uniquely, the endogo® is designed to be used in any clinical environment. It can be used with any standard optical endoscope (flexible or rigid) and any standard light source.

Benefits

- Improved documentation
 - Medico-legal documentation
 - Comprehensive serial examination analysis
- Enhanced patient education and instruction
- Improved surgeon ergonomics
- Enhanced equipment mobility
- Improved efficiency
- Enhanced communications between surgeons; residents and support staff

For use in a broad range of clinical applications

Otolaryngology – Head & Neck Surgery

- Routine examinations of the ear, nose and throat
- Transnasal flexible laryngoscopy (TFL) with biopsy
- Trans-Nasal Esophagoscopy (TNE)
- Office based sinus procedures
- Difficult airway
- Bedside consultation

Speech & Language Pathology

- Flexible Endoscopic Evaluation of Swallowing (FEES)
- Flexible Endoscopic Evaluation of Swallowing with Sensory Testing (FEEST)

The endogo® provides more comprehensive video capabilities and improved economies of scale compared to traditional video tower systems

Traditional video cart system used in one exam room

Exam 1	Exam 2	Exam 3	Hospital
No Video	No Video	Video	No Video

endogo® used in multiple rooms and beyond

Exam 1	Exam 2	Exam 3	Ward/Hospital
Video	Video	Video	Video
